FOR CANCER
IMMUNOTHERAPY

The Think Tank is promoted by the NIBIT Foundation in collaboration with the Parker Institute for Cancer Immunotherapy and the World Immunotherapy Council

WIC
World Immunotherapy Council

The IX Think Tank of the Italian Network for Tumor Bio-Immunotherapy (NIBIT) Foundation is focused on sharing with the enlarged scientific community the research findings and initiatives of the **NIBIT Foundation** research team in the context of the rapidly evolving field of cancer immunotherapy worldwide. A great opportunity of professional exchange and scientific update for all participants.

As for the past editions, the Meeting is organized in collaboration with **The Parker Institute for Cancer Immunotherapy (PICI)** in San Francisco and the **World Immunotherapy Council (WIC)**. During the event, worldwide acknowledged scientists in the field of cancer immunotherapy will debate about pre-selected scientific, translational and clinical research topics, engaging the attendees in highly interactive discussions.

Aims of the meeting will be:

1. Sharing the vision on highly selected I-O topics
2. Implementing new collaborations (pre-clinical/clinical/educational) among participants and with the organizational (and financial) support of the scientific Co-Organizing entities
3. Presenting research projects/ideas by pre-selected (also through WIC) young investigators in the identified topics of the meeting to be discussed and eventually hosted in Institutions participating to the Think Tank
4. Generating a white paper manuscript
